PROFILE INFO

I am a self-taught problem solver and creator of innovative solutions, specializing in the MERN stack. I have been studying front-end technologies for 2 years and back-end technologies for 1 and a half years. I have the ability to quickly learn any technology that comes my way and I enjoy delving into programming-related topics. I am always willing to learn and committed to delivering quality solutions for my clients.

WORK EXPERIENCE

Self-Employed Front-End Dev

2021

As a self-employed Front-End Developer, I designed responsive websites, optimized web applications, and maintained high-quality graphic standards, further refining my problem.

Bookkeeping

2022 - 2023

At The Home Depot, I managed bookkeeping, including balancing cash registers and deposit control, while also troubleshooting payroll discrepancies. In addition, I utilized the Linux operating system for company software tasks, managing system issues, and performing basic commands, including software updates and file management.

IT Support | Concentrix

2023

In my role as an IT Support Specialist at Concentrix, I provided technical assistance to customers, addressing software and hardware issues, guiding problem resolution steps, and implementing remote solutions. This experience enhanced my problem-solving abilities, technical skills, and customer service capabilities in a dynamic IT environment.
